

Asset Inventory Module – Add/Edit Form Layout

Overview

The **Asset Inventory Module** is designed to manage all company assets, including laptops, desktops, keyboards, monitors, mice, printers, networking equipment, furniture, and other office equipment. Each physical asset is maintained as an individual record with its own unique **Asset ID** and **Barcode/QR Code**, allowing accurate tracking throughout its lifecycle.

Group 1: Basic Information

Field	Type	Required
Asset ID	Auto Generated	Yes
Barcode / QR Code	Auto Generated / Manual Entry	Yes
Asset Name	Text	Yes
Asset Category	Dropdown	Yes
Asset Sub Category	Dropdown	No
Brand	Dropdown	No
Model	Text	No
Manufacturer	Text	No
Serial Number	Text	No
Parent Asset	Lookup (Linked Laptop/Desktop/Server)	No

Example

Field	Example Value
Asset ID	AST000001
Barcode	BC000001
Asset Name	Dell Latitude 7440
Asset Category	IT Equipment
Asset Sub Category	Laptop
Brand	Dell

Field	Example Value
Model	Latitude 7440
Manufacturer	Dell Technologies
Serial Number	DL7440SN12345
Parent Asset	None

Group 2: Assignment Information

Field	Type	Required
Assigned To	Employee Dropdown	No
Employee ID	Auto Fetch	No
Department	Auto Fetch	No
Branch	Dropdown	No
Office Location	Dropdown	Yes
Floor	Dropdown	No
Room	Dropdown	No
Workstation	Text	No

Example

Field	Example Value
Assigned To	John Doe
Employee ID	EMP00125
Department	Information Technology
Branch	Dubai Branch
Office Location	Dubai Head Office
Floor	2
Room	IT-205
Workstation	WS-15

Group 3: Purchase Information

Field	Type	Required
Purchase Date	Date	No
Purchase Cost	Currency	No
Vendor	Dropdown	No
Purchase Order No.	Text	No
Invoice Number	Text	No
Warranty Start	Date	No
Warranty End	Date	No

Example

Field	Example Value
Purchase Date	15-Jan-2025
Purchase Cost	AED 4,500
Vendor	Dell UAE
Purchase Order No.	PO-2025-00125
Invoice Number	INV-985412
Warranty Start	15-Jan-2025
Warranty End	15-Jan-2028

Group 4: Asset Status

Field	Type	Required
Status	Dropdown	Yes
Condition	Dropdown	Yes
Remarks	Text Area	No

Status Options

- Available

- In Use
- In Stock
- Under Repair
- Lost
- Disposed

Condition Options

- New
- Good
- Fair
- Poor
- Damaged

Example

Field	Example Value
Status	In Use
Condition	Good
Remarks	Assigned to Finance Department

Group 5: Opening Stock

Field	Type	Required
Opening Quantity	Number	Yes
Opening Date	Date	Yes
Opening Location	Dropdown	Yes
Opening Value	Currency	No
Reference Number	Text	No
Remarks	Text Area	No

Example

Field	Example Value
Opening Quantity	10
Opening Date	01-Jan-2025

Field	Example Value
Opening Location	Main Warehouse
Opening Value	AED 45,000
Reference Number	OPEN-STK-001
Remarks	Initial ERP Migration

Asset Inventory Listing Screen

The listing page should display the following columns:

Asset ID	Barcode	Asset Name	Category	Brand	Serial Number	Assigned To	Opening Qty	Location	Status	
AST000001	BC000001	Dell Latitude 7440	Laptop	Dell	DL12345	John Doe	1	Dubai Office	In Use	V E
AST000002	BC000002	Dell KB216 Keyboard	Keyboard	Dell	KB12345	John Doe	1	Dubai Office	In Use	V E
AST000003	BC000003	Dell MS116 Mouse	Mouse	Dell	MS12345	John Doe	1	Dubai Office	In Use	V E
AST000004	BC000004	Dell P2422H Monitor	Monitor	Dell	MN98765	John Doe	1	Dubai Office	In Use	V E

Notes

- Every physical asset must have a **unique Asset ID** and **Barcode/QR Code**.
- Peripherals such as keyboards, mice, monitors, and docking stations should be maintained as separate asset records.
- Related peripherals can be linked to a primary device using the **Parent Asset** field.
- The module should support **Create, Edit, View**, and **List** operations with proper field validations.
- Opening stock should be captured during the initial setup and stored separately for inventory reconciliation and reporting.
